Adithi Madduluri

adithim003@gmail.com • +1 (571) 576-4170 • LinkedIn • GitHub• Medium

Summary

Data professional with 1+ years of experience building pipelines and Power BI dashboards, with Python, SQL, and ML frameworks (TensorFlow, PyTorch, Scikit-learn). Cut processing time 83% on a 6.3M-transaction pipeline and lifted lead-to-customer conversion 25%. M.S. in Data Science, Snowflake certified, pursuing Microsoft Fabric Data Engineer certification.

Skills

Cloud & Data Tools: Microsoft Fabric, Azure Synapse Analytics, Azure Data Factory, Power BI, Snowflake, BigQuery, Git/GitHub, Excel
Programming: Python, SQL, R, JavaScript, HTML5, CSS
Libraries: TensorFlow, Keras, PyTorch, OpenCV, Scikit-Learn, Pandas, NumPy, Matplotlib, Seaborn, FastAPI
Frameworks: React.js, Node.js, Flask
Databases: SQL Server, MySQL, MongoDB

Experience

Data Engineer June 2026 – present
Techstar Group

- Built metadata-driven ADF pipelines (SQL Server, REST APIs, CSV/JSON to ADLS Gen2) with incremental loads and scheduled triggers for daily and weekly batches.
- Designed bronze/silver/gold layers with Databricks, PySpark, and Delta Lake; wrote optimized SQL for analytics, with governed access via Unity Catalog.

Darwinbox Jan 2024 – July 2024
Data Analyst

- Built an API-based LinkedIn scraper extracting company and individual profiles at ∼500 accounts per 30 minutes for Account Intelligence workflows.
- Automated CRM workflows to streamline task management and improve cross-team efficiency.
- Analyzed customer data across five regions and built dashboards defining ideal customer profiles, lifting lead-to-customer conversion 25% in six months.

Gagellan Global Solutions Pvt Ltd Oct 2022 – Nov 2023
Data Analyst

- Engineered feature extraction pipelines preparing loan data for LSTM time-series models, improving due-diligence efficiency to 93% (SMART Incentives project).
- Built scalable ADF ETL pipelines, integrated SQL Server with Azure for real-time analytics, and created Power BI dashboards for historical and predictive insights.

Academic Projects

Twitch Streamer Network Analysis

- Applied Louvain community detection to 200 streamers, validating a "small-world" structure (0.72 clustering coefficient); analyzed engagement to find optimal broadcast windows.
- Built an interactive JavaScript dashboard visualizing "bridge" nodes connecting gaming communities.

Finance Data Engineering Pipeline using Microsoft Fabric

- Architected an end-to-end Medallion pipeline on Microsoft Fabric (PySpark, Delta Lake) processing 6.3M+ financial transactions.
- Built a star schema with SCD Type 2 and parameter-driven incremental loads, cutting processing time by 83% with a 99.8% data quality pass rate.

Medium Article Agent

- Built a browser extension embedding an AI chat sidebar in Medium articles; integrated 6 LLM providers (Groq, OpenAI, Anthropic, Gemini, OpenRouter, Together AI) with real-time streaming.
- Implemented SPA navigation detection (MutationObserver, History API, URL polling) and content extraction storing up to 15,000 characters.

Education

University of Massachusetts Dartmouth Dartmouth, MA
Master's in Data Science

Chaitanya Bharathi Institute of Technology Hyderabad, India
B.E. Artificial Intelligence and Data Science

Certifications

Microsoft Fabric Data Engineer Associate 2026
Snowflake Data Engineering Professional 2026
Getting Started with Data Analytics in AWS 2023
Microsoft Azure AI Fundamentals 2022
